# SKIN TIGHTENING

## Ultraformer MPT

### Firm, Tighten and Lift

Ultraformer MPT is a non-invasive aesthetic treatment that uses HIFU Technology (High-Intensity Focused Ultrasound) to stimulate collagen production, to lift and tighten sagging skin. It can be used to target specific areas of the face to treat fine lines, wrinkles, improve contours, decrease facial fat around the jowls, as well as on the body to firm and tighten loose skin. It is often known as a non-surgical facelift, making it a popular option for those seeking youthful, firmer-looking skin.
